23. Barnwell State Park (Swimming Lake)

(Barnwell County)

1. Problem plant species

Waterlily

2. Management objective

Reduce or remove problem plants to the extent they do not interfere with recreational opportunities.

3. Selected control method

2,4-D BEE granular

4. Area to which control is to be applied

3 acres in swimming lake.

5. Rate of control agent to be applied

200 pounds per acre

6. Method of application of control agent

Apply granular with spreader throughout lake

7. Timing and sequence of control application

Apply when plants are actively growing.

8. Other control application specifications

Monitor plant growth prior to treatment.

9. Entity to apply control agent

Commercial applicator contracted and monitored by SCPRT.

10. Estimated cost of control operations

\$1,667

11. Potential sources of funding

S.C. Department of Parks, Recreation and Tourism 50%

S. C. Department of Natural Resources 50%

-------	---------	-----	-------	-------	-------	-----

- a. Manage the distribution and abundance of nuisance aquatic plant populations at levels that minimize adverse impacts to water use activities and the environment through the use of federal and state approved control methods.
- b. Maintain or enhance native aquatic plant populations at levels beneficial to water use, water quality, and fish and wildlife populations through selective control of nuisance plant populations where feasible, introduction of native plant species where appropriate, and public education of the benefits of aquatic vegetation in general.
- c. Seek to prevent further introduction and distribution of problem species through public education, posting signs at boat ramps, regular surveys of the water body, and enforcement of existing laws and regulations.

24. Charles Towne Landing State Park

(Charleston County)

1. Problem plant species

Duckweed Alligatorweed

Pennywort

2. Management objective

Reduce or remove problem plants to the extent they do not interest with recreational opportunities.

3. Selected control method

Problems species Control Agent

Duckweed Fluridone
Alligator weed Glyphosate
Pennywort Glyphosate

4. Area to which control is to be applied

Fluridone - 3 acres Glyphosate - 1 acre

5. Rate of control agents to be applied

Fluridone - 1 pint per acre Glyphosate - 7.5 pints per acre

6. Method of application of control agents

Fluridone - Apply subsurface throughout lake

Glyphosate- Spray on surface of foliage with appropriate surfactant

7. Timing and sequence of control application.

Fluridone & glyphosate applied when plants are actively growing

8. Other control application specifications

None

9. Entity to apply control agent

Commercial applicator contracted and monitored by SCPRT.

10. Estimated cost of control operations

\$773

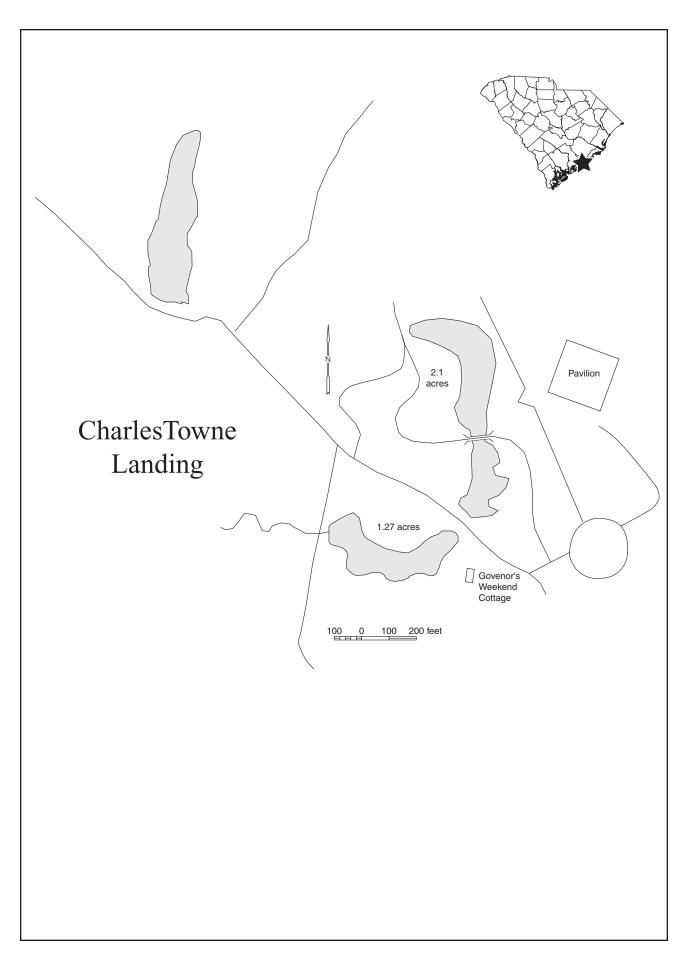

11. Potential sources of funding

- S.C. Department of Parks, Recreation and Tourism 50%
- S. C. Department of Natural Resources 50%

(Percentage of match subject to change based on availability of Federal and State funding.)

12. Long term management strategy

- a. Manage the distribution and abundance of nuisance aquatic plant populations at levels that minimize adverse impacts to water use activities and the environment through the use of federal and state approved control methods.
- b. Maintain or enhance native aquatic plant populations at levels beneficial to water use, water quality, and fish and wildlife populations through selective control of nuisance plant populations where feasible, introduction of native plant species where appropriate, and public education of the benefits of aquatic vegetation in general.
- c. Seek to prevent further introduction and distribution of problem species through public education, posting signs at boat ramps, regular surveys of the water body, and enforcement of existing laws and regulations.

25. Kings Mountain State Park - Crawford Lake

(York County)

1. Problem plant species

Slender naiad

2. Management objective

Reduce or remove problem plants to the extent they do not interfere with recreational opportunities.

3. Selected control method

Aquathol K

4. Area to which control is to be applied4 acres in swimming and paddle boat area

5. Rate of control agent to be applied

Four gallons per acre.

6. Method of application of control agent

Apply subsurface throughout lake

7. Timing and sequence of control application

Apply in May or June when naiad growth is initiated.

8. Other control application specifications

Monitor plant growth prior to treatment.

9. Entity to apply control agent

Commercial applicator contracted and monitored by SCPRT.

10. Estimated cost of control operations

\$1,040

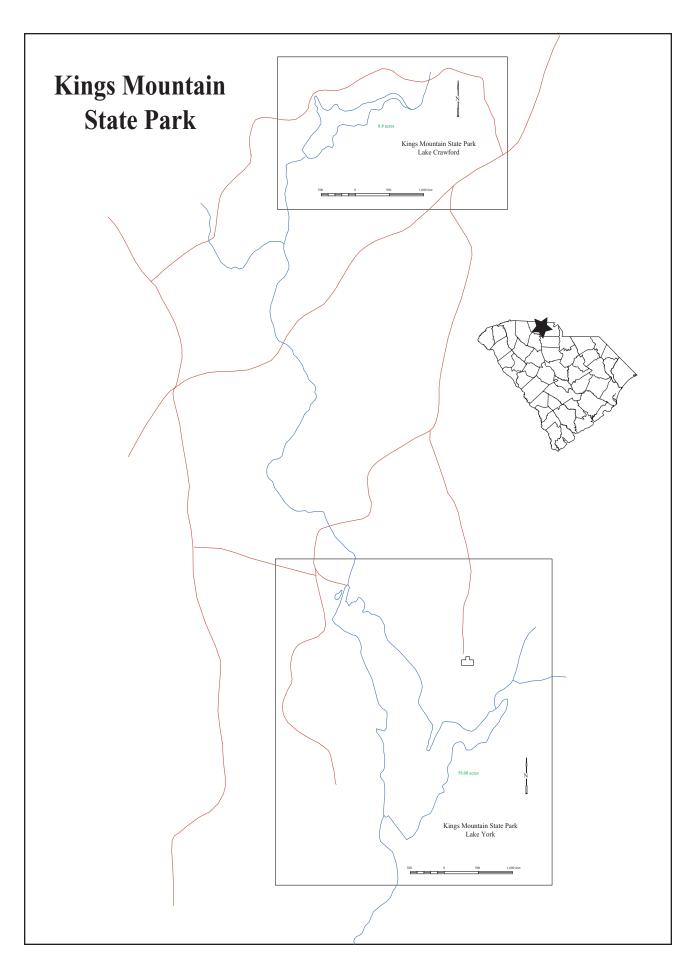

11. Potential sources of funding

S.C. Department of Parks, Recreation and Tourism 50%

S. C. Department of Natural Resources 50%

12. Long term management strategy

- a. Manage the distribution and abundance of nuisance aquatic plant populations at levels that minimize adverse impacts to water use activities and the environment through the use of federal and state approved control methods.
- b. Maintain or enhance native aquatic plant populations at levels beneficial to water use, water quality, and fish and wildlife populations through selective control of nuisance plant populations where feasible, introduction of native plant species where appropriate, and public education of the benefits of aquatic vegetation in general.
- c. Seek to prevent further introduction and distribution of problem species through public education, posting signs at boat ramps, regular surveys of the water body, and enforcement of existing laws and regulations.

26. Little Pee Dee State Park

(Dillon County)

1. Problem plant species

Spikerush

Cowlily

2. Management objective

Reduce or remove problem plants to the extent they do not interfere with recreational opportunities.

3. Selected control method

2,4-D BEE granular

4. Area to which control is to be applied

15 acres adjacent to the parks day use area, along the park dam and adjacent to the campground

5. Rate of control agent to be applied

200 pounds per acre

6. Method of application of control agent

Apply granular with spreader throughout lake

7. Timing and sequence of control application

Apply when plants are actively growing.

8. Other control application specifications

Monitor plant growth prior to treatment.

9. Entity to apply control agent

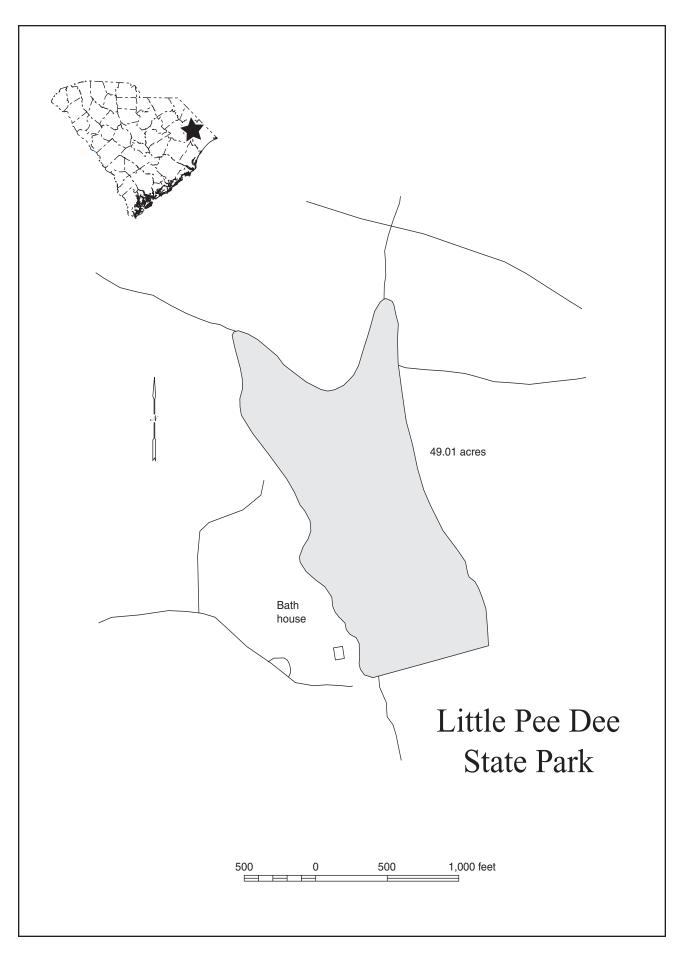

Commercial applicator contracted and monitored by SCPRT.

10. Estimated cost of control operations

\$5,558

- 11. Potential sources of funding
 - S.C. Department of Parks, Recreation and Tourism 50%
 - S. C. Department of Natural Resources 50%

- 12. Long term management strategy

27. Santee State Park - Swimming Lake

(Orangeburg County)

1. Problem plant species

Coontail

2. Management objective

Reduce or remove problem plants to the extent they do not interfere with recreational opportunities.

3. Selected control method

Reward (Diquat)

4. Area to which control is to be applied

10 acres

5. Rate of control agent to be applied

2 gallons per acre

6. Method of application of control agent

Apply subsurface throughout lake

7. Timing and sequence of control application

Apply when plants are actively growing.

8. Other control application specifications

Monitor plant growth prior to treatment.

9. Entity to apply control agent

Commercial applicator contracted and monitored by SCPRT.

10. Estimated cost of control operations

\$1,170

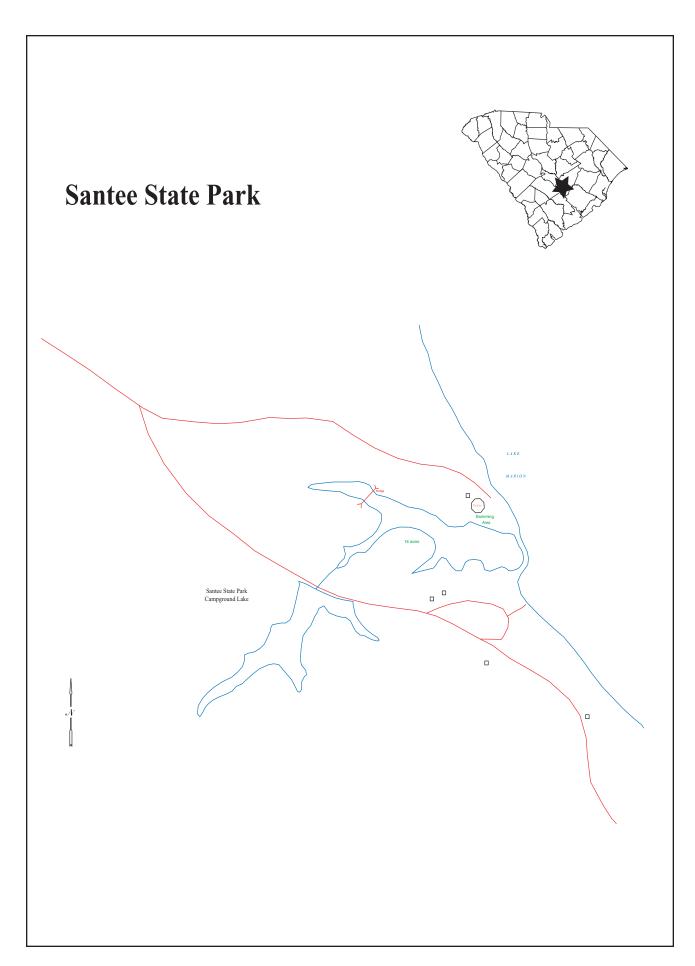

11. Potential sources of funding

S.C. Department of Parks, Recreation and Tourism 50%

S. C. Department of Natural Resources 50%

12. Long term management strategy

- a. Manage the distribution and abundance of nuisance aquatic plant populations at levels that minimize adverse impacts to water use activities and the environment through the use of federal and state approved control methods.

28. Sesquicentennial State Park

(Richland County)

1. Problem plant species

Waterlily

Watershield

2. Management objective

Reduce or remove problem plants to the extent they do not interfere with recreational opportunities.

3. Selected control method

2,4-d BEE granular

4. Area to which control is to be applied

5 acres in swimming and bank fishing portions of the lake.

5. Rate of control agent to be applied

200 pounds per acre

6. Method of application of control agent

Apply granular with spreader throughout lake

7. Timing and sequence of control application

Apply when plants are actively growing.

8. Other control application specifications

Monitor plant growth prior to treatment.

9. Entity to apply control agent

Commercial applicator contracted and monitored by SCPRT.

10. Estimated cost of control operations

\$2,779

11. Potential sources of funding

S.C. Department of Parks, Recreation and Tourism 50%

S. C. Department of Natural Resources 50%
